## **Sirius Computer Solutions Achieves IBM Business Partner Service-Oriented Architecture (SOA) Specialty**

**San Antonio, TX – October 19, 2009** – Sirius Computer Solutions, a national technology solutions provider and [IBM Premier Business Partner](#), earned the IBM SOA Specialty Accreditation by meeting both business and technical criteria. Sirius has made significant investments in IBM SOA products and technologies, so the company can help its clients achieve all the benefits that SOA offers.

"The SOA Specialty Accreditation process for IBM Business Partners allows us to measure the skills and investments of our partners, giving clients the assurance that the business partner meets IBM's requirements for successful SOA implementations," said Kevin Nunnally, vice president of IBM WebSphere sales for North America. "By achieving this status, Sirius has demonstrated the right expertise, experience and products needed to provide Smart SOA solutions."

Sirius has a national team of [IBM software sales specialists](#) certified in [IBM SOA products and technologies](#), and a consulting services team certified as SOA architects and developers. The combination of pre-sales, sales and implementation services teams allows Sirius to provide skills and geographic presence to help deliver SOA solutions to meet the unique requirements of each client.

"A Smart SOA approach can deliver the transformation that an IT organization requires to address complex challenges of today's IT landscape and economic climate," said Darrin Nelson, vice president of Sirius software sales. "To support each stage of the SOA lifecycle, IBM has selected software products that make up the SOA Foundation from the broader IBM software portfolio, and that gives us the ability to master those products and integrate them into our clients' application environments."

**About Sirius:** Sirius is a national IT solution provider and IBM Premier Business Partner dedicated to helping clients implement advanced infrastructure solutions that provide a competitive advantage and a positive return on investment.
