Sirius Computer Solutions Achieves IBM Business Partner Information on Demand (IOD) Specialty

San Antonio, TX – November 3, 2009 – [Sirius Computer Solutions](http://www.siriuscom.com), a national technology solutions provider and IBM Premier Business Partner, has earned the IBM Information On Demand (IOD) Specialty Accreditation by meeting both business and technical criteria. Because of significant investments Sirius has made in IBM IOD products and technologies, the company can help its clients achieve all the benefits that IOD offers.

[IBM Information On Demand](http://www.ibm.com/iod) is a strategy that addresses the challenges of unlocking and extracting value from information to globalize and integrate business processes and become more innovative. The Information On Demand Specialty accreditation is awarded to elite business partners only upon meeting specific education, certification and technical validation criteria, demonstrating the company's expertise in and commitment to the fast-growing market for information management solutions.

"IBM Information Management solutions enable businesses to extract the maximum value from their information. The Information On Demand Specialty accreditation recognizes the commitment that Sirius has made to develop the skills and product knowledge necessary to help their clients turn information into a real, competitive advantage," said Bob Finnecy, IBM Vice President, Software Channel Sales Americas.

Sirius has a national team of IBM software sales specialists certified in IBM IOD products and technologies, and a consulting services team certified as IOD architects and developers. The combination of pre- and post-sales teams allows Sirius to provide skills and geographic presence to help deliver [IOD solutions](#) to meet the unique requirements of each client.

According to Darrin Nelson, Sirius VP of Software Sales, "Businesses today are being inundated with unprecedented amounts of information. The ability to manage all that data, to mine it effectively, and to locate, recover and apply it in a meaningful way is essential to every business. We've committed resources – both pre-sale and post-sale – in the areas of enterprise data management, enterprise content management and trusted business information, to help our clients take control over what is, ultimately, their most valuable business resource."

About Sirius: Sirius is a national IT solution provider and IBM Premier Business Partner that is dedicated to helping clients implement advanced infrastructure solutions that provide a competitive advantage and a positive return on their investment.
