## **Sirius Computer Solutions Receives Certification to Become an Authorized Seller of All IBM Software Products**

*Sirius meets the skills requirements of the new IBM Software Value Plus initiative*

**San Antonio, TX – January 27, 2010** – Sirius Computer Solutions, Inc., a national technology solutions provider and IBM Premier Business Partner, has announced today that it has achieved 100% IBM Software Value Plus (SVP) authorization. As a result of this authorization, Sirius can resell all IBM Software products across all five brands, including Information Management, Lotus, Rational, Tivoli and WebSphere.

IBM recently launched the Software Value Plus initiative designed to meet the demands of clients who are looking to drive more value from their technology investments by working with trusted partners with proven skills to quickly and effectively implement new infrastructures. This new initiative enables IBM Business Partners to set themselves apart by gaining key technical and industry skills necessary for smarter technology implementations that help clients achieve their business goals.

"IBM is committed to supporting an ecosystem of skilled partners that can provide the most value to our shared clients," said Sandy Carter, vice president, IBM Software Group Channels. "Business Partners who invest in the proper skills and expertise are well positioned to help clients reduce risk in solution implementations and increase their return on investment over time. Sirius is a top-tier reseller authorized across all IBM Software brands and they are in a unique position to provide clients with advanced, comprehensive business solutions."

In addition to Software Value Plus, Sirius has also achieved accreditations in IBM ValueNet for Cognos, InfoSphere, Optim and FileNet; IBM Information on Demand (IOD) Specialty; IBM Service-Oriented Architecture (SOA) Specialty; IBM AAA-level Tivoli Deployment; and IBM Dynamic Infrastructure Specialty Elite.

According to Darrin Nelson, Sirius vice president for Software Sales, the Software Value Plus authorization reflects the commitment that Sirius has made to selling, supporting and achieving certification in all major IBM software brands. "We have a dedicated team of highly certified software and technology experts who are ready to assist our clients with all aspects of their IBM Software needs."
