

## **For Immediate Release:**

### **Sirius Computer Solutions Closes First NUMA-Q Deal**

Sirius Computer Solutions is the first IBM Business Partner in North America to provide a solution running on the new line of NUMA-Q servers. Sirius enabled Young America to boost performance by replacing older technology with new NUMA quads. Sirius and IBM Global Services provided implementation services for the installation.

“Many of the world’s largest company’s depend on Young America Corporation for successful customer interaction, including mailings and promotions. IBM NUMA-Q systems support our 900-seat call center and fulfillment business,” said Mary Lynn Perushek, CIO, Young America Corporation. “This year our NUMA-Q system will grow to support three generations of Intel processors, allowing us to leverage our past purchases while gaining the considerable performance boost of the E-410. No other server vendor has been able to offer us this kind of investment protection.”

“Sirius was one of the only Business Partners in North America with the training and technical expertise on NUMA-Q. We flawlessly delivered a product that was an exact fit for Young America,” said Debbie Dove, Regional Account Manager for Sirius Computer Solutions.

The inclusion of the NUMA-Q E410 into its product line up allows Sirius to offer a broad spectrum of solutions to a wide customer base, including Linux and Windows 2000 users. The NUMA-Q E410 is the world’s most powerful Intel-based server scaling to 64 processors and 64 GB RAM. The system supports up to 100 TB of storage. It is also the only server in the world to support multiple generations of Intel processors in a single system enabling customers to leverage existing investments while taking advantage of the latest technology.

Founded in 1972, Young America Corporation has evolved into the leader in integrated fulfillment and consumer interaction. Since beginning as the Dile Corporation, a three-client promotional fulfillment house, Young America has more than 1,000 employees at six locations and processes orders through seven ZIP codes, making it one of the busiest addresses in the United States. Along the way it has expanded its fulfillment services and integrated them with cutting-edge teleservices and database management capabilities. Some of Young America’s clients include Eastman Kodak, Nestle and Pepsi-Cola.

Established in 1980, Sirius Computer Solutions is headquartered in San Antonio, Texas and has over 30 regional and satellite offices nationwide. Sirius is an IBM Premier Business Partner and the largest IBM A/S 400 Solution Provider in North America. Sirius is also one of the largest J. D. Edwards software Alliance Partners in the world and a Siebel Platform Partner. Sirius’ commitment to customer satisfaction is unparalleled in the industry. Sirius provides value added solutions for customers in the enterprise systems marketplace by utilizing leading edge technology, services and application offerings. They offer a wide range of solutions in the areas of Enterprise Resource Planning, Business Intelligence, e-business, Data Collection, Business Process Consulting, Technology Services, Server Solutions and Network Solutions.
