

HP Product Offerings

Hardware, Software and Services

A rock-solid foundation for an industry-standard data center

Since its humble beginnings more than seven decades ago, HP has built its reputation as maker of some of the world's best-engineered electronics. Today, from netbooks and laptops to enterprise servers, storage and networking, HP is a true innovator of IT infrastructure based on industry-standard technologies, and has grown to become the world's biggest IT company. Sirius Computer Solutions has made many of these proven, powerful products available as part of our own portfolio, so any client can find the HP products they need to assemble a complete solution that will help them overcome any IT challenge.

HP BLADESYSTEM PORTFOLIO

As the volume leader in blade systems, HP BladeSystem blades, chassis, storage and integrated networking give companies:

- A simple solution, with several storage and server blades stacked neatly into a single enclosure
- Cabling and cooling built into the enclosure, not the servers, leading to lower power consumption and fewer tangled wires
- Increased manageability with built-in software tools
- Versatility to mix and match storage and server blades specifically to run critical applications on Windows® or Linux® operating systems
- Flexibility to fit in or out of a raised-floor data center environment

HP CONVERGED INFRASTRUCTURE

The HP Converged Infrastructure combines servers, storage and networks with facilities, all of which share a common management platform. It provides a blueprint for the data center that eliminates costly and rigid IT silos, so you can spend much more of your IT budget on business innovation. The result is an infrastructure that delivers a new level of simplicity, integration and automation leading to:

- Faster time-to-revenue
- Lower costs of acquisition and implementation
- Flexible response to business changes
- Lower risks

WHY SIRIUS FOR YOUR HP SOLUTIONS?

With decades of experience creating optimized IT environments for thousands of clients, Sirius provides best-of-breed data center solutions sourced from the world's top technology companies. And when it comes to x86-based servers, blades, laptops and desktops, as well as networking and storage products, for many clients that means HP.

An HP Elite Partner, Sirius has a national team of experts who hold over 450 HP sales and technical certifications and can help integrate HP hardware, storage and networking products into your specific IT environment. Our IT infrastructure solution offerings include:

- Business Continuity (Backup and Recovery, Disaster Recovery)
- Business Optimization
- Collaboration, Commerce, Enterprise Content Management, Enterprise Modernization
- Data Center/Unified Fabric
- Government solutions and contracts
- Identity and Access Management
- Infrastructure for ISVs (JDA®, Lawson®, Oracle®, SAP® and more)
- Virtualization, Consolidation and Optimization
- Security and Compliance
- Storage Efficiency
- Unified Communications

HP SERVER PRODUCTS

ProLiant® blade servers (BL): Affordable, out-of-the-box IT infrastructure that's simple to set-up and manage, and has a small footprint.

ProLiant rack servers (DL): Density-optimized for flexibility, with rack and cluster models that are ideal for multi-server deployments.

ProLiant tower servers (ML): Entry-level servers for small and remote offices, with tower and rack-mount options.

ProLiant Scalable (SL): Built to enable massive compute environments, their modular architecture reduces the number of components, and cuts energy use.

BCS (Business Critical Systems): Built to enhance the business return on your high-stakes infrastructure investments. Anticipate and resolve issues before they impact your critical business operations.

HP NETWORKING PRODUCTS

ProCurve® networking: Networking infrastructure products, solutions and services enabling high-performance Ethernet connectivity across secure, mobile, multi-service networks.

ProLiant networking products: Networking products for ProLiant ML, DL, and BL servers provide reliability and performance for both copper and fiber-optic environments.

HP SOFTWARE & SOLUTIONS

Business Technology Optimization (BTO): BTO automates the supply chain of IT services, and better aligns IT with the rest of the business. It helps reduce costs and improve quality to maximize business innovation.

Information Management (IM): IM helps IT classify, preserve, discover, analyze and recover information faster. It helps manage risk at the lowest cost, letting IT focus on innovation.

HP TOTAL CARE SERVICES OFFERINGS

HP Total Care offers valuable services, tips and tools like easy financing, drivers and downloads, free online classes, support, and recycling. And it's all available through Sirius Computer Solutions, as part of your complete HP solution.

Elite Partner 

HP STORAGEWORKS PRODUCTS

Designed for small and midsize companies, HP StorageWorks delivers simple, affordable, reliable business outcomes to help bridge the gap between the explosive growth of data and your IT infrastructure.

Disk storage systems: Simplified data consolidation; optimized file serving

- † Removable disk backup
- † D2D backup systems
- † Disk enclosures
- † NAS systems
- † HP 3PAR® storage
- † P2000/MSA disk arrays
- † P4000 G2 SAN solutions (formerly LeftHand) for virtualized servers, database and e-mail applications
- † EVA4400 array

Tape storage and media: Reliable and cost-effective tape, automation, and disk-based data protection

- † Tape drives and tape blades
- † Business class tape libraries
- † Tape autoloaders
- † Storage media

Storage networking: SAN standards-based connectivity infrastructure

- † Host bus adapters
- † FC switches
- † FCOE switches
- † Converged network adapters
